Q1. Read the Case Study given below and answer the following Question:

Ram is in the second year of his full-time job after graduation in engineering. He enjoys design but he is becoming increasingly concerned that his work is not being adequately checked by more experienced engineers. He has been assigned to assist in the design of number of projects that involve public safety such as schools and overhead walkways between buildings. He spoke to his supervisor whose engineering competence he respects, and the supervisor told that more experienced engineers will check his work. Later, he discovers that his work is often not checked. Instead, his drawings are stamped and passed on to the contractor. Some of the smaller projects he designs are under construction within a few weeks after the designs are completed.

At this point, Ram calls one of his former professors in engineering college for advice. "I am really scared that I am going to make a mistake that will kill someone", Ram says. "I try to overdesign, but the projects that I have been assigned to, are becoming increasingly difficult. What should I do?" Ram's professor tells him that he cannot ethically continue his present course, as his work surpasses his qualifications and may endanger the public.

What should Ram do and why?

- Q2.** Differentiate between Ethics and Morality giving suitable examples.
- Q3.** "The Service Learning is a methodology falling under the category of Experiential Education." Discuss.
